If students choose to double major and/or minor, the following catalog rule applies: any course applied toward the completion of one major or minor may not also be applied toward the fulfillment of elective requirements in another major or minor.

*40 upper level (300-400) credits are required for graduation. This plan accounts for all but 11 of those credits. These additional 11 credits could come from general education courses, an added minor, or additional biology electives above those required for the degree.

**For students wishing to attend graduate or professional school after graduation, CHE 205 & 206 may be required instead. Students should speak with their advisor and research the requirements and prerequisites of their desired graduate or professional programs early enough to ensure that additional coursework can be added, if necessary.
